

EYE-CHEMICALS IN THE EYE

- Wear gloves and if possible, goggles.
- If needed, hold the injured eye open with your fingers.
- Immediately rinse the eye with large amounts of clean water for 20-30 minutes. Use eyewash station if available.
- Tip the head so the injured eye is down and the water washes the eye from nose out to side of the face.
- If the student is wearing contact lenses, remove them if you are able.

CALL EMS/911

While you are rinsing the eye, have someone call **POISON CONTROL**
1-800-222-1222
Follow their directions.

Continue rinsing the student's eye until EMS arrives.

Contact responsible school authority & parent/guardian.

Document care provided.
